

Common size / specification table

Common shaft diameter (d)	Typical catalogue range / notation
0.375" - 4.000" (≈10 mm - 100 mm)	AESSEAL B09xU / internal bellows ranges list shaft sizes 0.375" - 4.000" (10 - 100 mm) for internal bellows families.
0.500" - 4.750" (≈12.7 mm - 121 mm)	A catalogue elastomer bellows example (P0204U) lists 0.500" - 4.750" (12.7 - 121 mm) with explicit pressure/temperature/velocity entries.
20 mm - 100 mm	Many bellows/component seal families (internal & external bellows) commonly published with 20 - 100 mm coverage (DIN/EN compatible bore/shaft fits).
Extended / custom sizes	Some manufacturers offer custom sizes beyond catalogue; for shafts >100 - 120 mm you should request engineered or cartridge solutions and a dimensional drawing.
