

Common sizes / specification examples

A — ISO / typical rod diameter series

The ISO series lists commonly used rod diameters; these are the diameters procurement teams typically filter by (mm):

Common rod diameters (mm): 8, 10, 12, 16, 20, 25, 32, 40, 50, 60, 63, 80, 90, 100, 125, 160, 200.

(Use ISO 3320 tables to match bore/rod series for cylinder standard sizes.)
